Bui Khuong Duy (Timi)

AI-Native Frontend Lead | React · Next.js · TypeScript

khuongduy1897@gmail.com 0933188294 Ho Chi Minh City https://buikhuongduy.com

Summary

AI-native Frontend Lead with 9+ years of experience building high-traffic web and mobile products with React, Next.js, Vue, and TypeScript. Led a team of 10 developers, architected multi-tenant platforms serving millions of monthly visits, and shipped products ranging from a 2M+ customer insurance platform to healthcare sites with 30M+ monthly views. I build AI into both products and the way teams work: from LLM-powered internal tools to Claude Code workflows across the team. I also run KD Labs, where I build open-source developer tools like KD Code, a VS Code extension that orchestrates multiple coding agents.

Experience

Aug 2026 – Present

KD Labs

Founder

• Tech: TypeScript, GraphQL, Micro-frontends, VS Code Extension API, Agent Client Protocol (ACP), iOS/Android, AES-256-GCM, Astro.

• Team size: Solo

• What I do:
- Founded KD Labs, an AI-native lab building open-source developer and productivity tools.
- Built KD Code, a VS Code extension that orchestrates multiple coding agents (Claude, Codex, OpenCode), with Best-of-N runs in isolated Git worktrees and side-by-side diff review.
- Built Simple OTP, a zero-network 2FA app for iOS and Android with AES-256-GCM encrypted storage.
- Structured the lab's web products as independently deployable micro-frontends sharing one design system and a typed GraphQL API layer.

• Result:
- Shipped 2 open-source products (MIT); KD Code on VS Code Marketplace and Open VSX, Simple OTP on the App Store.
- Published 12 technical articles on AI agents, mobile security, and cryptography at kd.io.vn.

Apr 2025 – Aug 2026

AFD - Marketing Agency

Front-End Lead · On-Site & Remote

• Tech: Next.js, TypeScript, GraphQL, TailwindCSS, Micro-frontends, Contentful, Strapi, Payload CMS, LLM APIs, Cloudflare, AWS, Terraform, Claude Code.

• Team size: 10 (Front-End Lead)

• What I do:

- Led a frontend team of 10 developers: architecture, task planning, code reviews, mentoring.
- Introduced an AI-native workflow: set up Claude Code with shared CLAUDE.md conventions, custom skills, and MCP, with human review on all AI-generated code.
- Architected a dynamic multi-tenant platform on Contentful: one Next.js codebase serving multiple brand sites, with per-tenant theming and pages composed from CMS blocks, letting marketing launch new sites without developers.
- Built the content data layer on GraphQL, with typed queries against the CMS so each page and CMS block fetches only the fields it needs.
- Designed a micro-frontend architecture that split large products into independently built and deployed frontend apps composed in a shared shell, with shared UI and conventions, so developers could ship features in parallel without blocking each other.
- Built an internal AI Content Engine that generates and publishes marketing content to Contentful with LLMs.
- Delivered projects on Strapi and evaluated Payload CMS as a self-hosted alternative, choosing the right CMS per project.
- Served sites with millions of monthly visits via Cloudflare CDN caching, and managed AWS infrastructure as code with Terraform.

• Result:
- Delivered 3 products (web platform, mobile app, AI Content Engine) in 6 months while leading a team of 10.
- Built and scaled a multi-tenant website system serving millions of monthly visits.
- Enabled independent deployments per micro-frontend, letting a 10-person team work in parallel with smaller, safer releases.
- Enabled marketing to launch new brand sites without developer involvement, turning site launches from a dev project into a CMS task.
- Moved content production from fully manual writing to an AI-assisted pipeline publishing directly to Contentful.
- Made AI-native development the team's standard workflow across 10 developers.

Aug 2021 – Apr 2025 **10X Consulting & Technology Ltd**

Frontend Web Developer

• Tech: Next.js (SSR), React, TypeScript, Vite, Webpack, React Query, React Hook Form, Zustand, Valtio, TailwindCSS, Framer Motion, Storybook, Docker, Kubernetes, CI/CD.

• Team size: 10

• What I do:
- Built Saladin, a one-stop insurance platform, working directly with the CEO and product managers to translate business goals into technical solutions and product features.
- Designed and built the design system from scratch with Storybook, and created shared internal packages reused across all projects.
- Set up project architecture and boilerplates (libraries, conventions, ESLint rules) for every new project, keeping the codebase consistent and maintainable.

- Integrated major Vietnamese payment gateways: MoMo, ZaloPay, Payoo, OnePay, Viettel Money.
- Improved page load performance with code splitting, lazy loading, CDN, and bundle analysis.
- Partnered with DevOps to build CI/CD pipelines, optimize Dockerfiles, and migrate deployment from Jenkins to Kubernetes.
- Worked closely with backend teams (Java, Go, Node.js) on API design and integration, and built internal Node.js tooling.
- Evaluated new technologies and shared them with the team, including the move from Redux to Zustand.

• Result:
- Saladin grew to 2M+ customers, offering 10+ insurance products from 7 insurers (Bao Viet, Bao Minh, Liberty, MSIG, PVI, VNI, BSH).
- Delivered internal admin tools used daily by staff and partners.

Jan 2020 – May 2021 **Hello Health Group**

Senior Web Developer

• Tech: Next.js (SSR), React, Vue.js, TypeScript, Webpack, React Flow, WordPress, PHP, Go.

• Team size: 8

• What I do:
- Migrated 9 WordPress healthcare sites to Next.js SSR together with the frontend lead and backend team, including HelloBacsi and HelloSehat.
- Built a dynamic chatbot builder with React and React Flow, letting the marketing team design and launch chatbot campaigns without developers.
- Built an ads management tool with Vue.js, featuring drag-and-drop layout and dynamic targeting conditions.
- Built a content editor tool with React that streamlined editing and publishing for the content team.
- Built an internal symptom checker tool in collaboration with the Data team.
- Developed custom WordPress themes and plugins before the platform moved to Next.js.
- Worked with product managers on feature improvements, and with backend teams (Go, PHP) on API integration.

• Result:
- Completed the migration of 9 sites from WordPress to Next.js in 2 months.
- Cut page load time from 4–5s to under 2s.
- HelloBacsi and HelloSehat became leading healthcare websites in the region, with 30M+ monthly page views.
- Enabled marketing to create multiple chatbot campaigns quickly, and simplified the content team's publishing workflow.

Aug 2018 – Oct 2019

Sutrix Group

Senior JavaScript Developer

• Tech: Angular, Cordova, NativeScript (Vue.js, React), Adobe Experience Manager, Java.

• Team size: 20+

• What I do:
- Developed and maintained a hybrid mobile sales app with Angular and Cordova.
- Researched and adopted NativeScript with Vue.js and React to build a native iOS & Android app for a major enterprise client in the Philippines.
- Built reusable components for Adobe Experience Manager (AEM) powering a high-traffic telecom website.
- Integrated APIs with the Java backend team.
- Mentored 2 interns until they became full team members.
- Ran tech-sharing sessions on emerging frontend technologies for the team.

• Result:
- Shipped 2 mobile apps for large enterprise clients, one with 10M+ downloads on Google Play.
- Built components for a telecom website (phone purchase and SIM registration) serving 25M+ monthly views.

Oct 2017 – Aug 2018

Maple Studio

Junior Web Developer

• Tech: HTML, CSS, JavaScript, WordPress, Shopify, Haravan, Node.js.

• Team size: 4

• What I do:
- Converted PSD and Illustrator designs into responsive, mobile-first landing pages and custom WordPress themes.
- Customized Shopify and Haravan themes to match client designs.
- Optimized page speed for client websites.
- Built internal Node.js tools to speed up the team's workflow.

• Result:
- Delivered 10+ themes across WordPress, Shopify, and Haravan, all on schedule.

Awards

2022 Saladin-er
10X Consulting & Technology Ltd
The award recognizes contributions to revamping websites on time and according to requirements.

Aug 2020 MVP of the Month
HelloHealthGroup
The award acknowledges the contribution of developing the chatbot and internal tools.

2016 Top 100 Startup Wheel Ho Chi Minh
Developing a Google Chrome extension improved the new tab experience.

Education

2015 – 2017 **VTC ACADEMY**
